Full-stack web engineer with a special interest in front-end development. My experience as a Front-end Software Engineer has given me the technical prowess to create high quality, modern, web applications that delight users. My work as a developer is built on a foundation of client project management, instilling communication and organization skills that have made me a more adaptable developer who is able to liaison between teams and stakeholders at any level of technical understanding. I am looking for roles that will allow me to utilize my skills in UX/UI design & implementation.

Experience

Front-End Software Engineer • 08/2021 - Current

The Atlas for Cities • San Diego, CA

- Act as the main individual front-end contributor for two customer facing applications, and one internal application built with Vue (options & composition API), Laravel, and Nuxt.
- Implement extensive end-to-end Cypress testing coverage across three large-scale applications.
- Assist with designing new features and pages using Sketch and Zeplin.
- Assist with task triage and creating discrete tasks based on high level product designs.
- Implement UI tracking across applications using Segment; assist with data reporting and visualization using Mixpanel.
- Create & update customer facing emails using Sendgrid & Handlebars.
- Contribute to weekly Engineering meetings with interesting professional development information, tech news, and code-sharing.

Associate Producer • 06/2019 - 10/2020

FableVision Studios • Boston, MA

- Acted as lead project manager on 3 to 5 animation, website, game, and/or interactive projects at a time, directing the day-to-day development from pre-production to launch and beyond.
- Managed and coordinated ongoing bug fixes, continuous optimization, and the roll-out of new features with both in-house and freelance developers, QA teams, clients, artists, and animators.
- Demonstrated excellent client communication to uphold project vision, manage expectations, and protect project scope and budget with a wide range of client teams of up to 20 members from varied industries.

Production Assistant • 05/2018 - 06/2019

FableVision Studios • Boston, MA

- Worked closely with developers to assist with content entry into Unity.
- Assisted lead producers with QA, data and asset management, scheduling, and project team check-ins.

Projects

MarketEdge • www.app.marketedge.the-atlas.com

Main specs: Vue 3 + Composition API, Laravel, TypeScript, Cypress

Data dashboard product aimed at providing B2G companies with valuable intent data, alerting them to new procurement opportunities available.

The Atlas for Cities • www.the-atlas.com

Main specs: Vue 2 + Options API, Nuxt, TypeScript, Cypress

LinkedIn-style application for Local Government professionals to browse & contribute case studies, and connect with each other.
